

Extension Team Guidelines for Gathering and Reviewing Data

The purpose of the Extension Team is to determine if a student needs differentiated services in the classroom. The Extension Team gathers information about nominated students. The Extension Team consists of teachers, administrators, and other school staff. A record is created for each student which may include: nominations, review of test and classroom data, observations or other pertinent information.

The information gathered should be drawn from multiple indicators and may include the following criteria:

Indicates the student has advanced aptitude for reasoning, thinking critically, and problem solving

Indicates the student has achieved an advanced level of content knowledge

Demonstrates the student's potential to perform at substantially high levels of accomplishment when compared with others of their age, experience, or environment
